IT DESIGN OPTIMIZATION SOLUTIONS

Adaptivity's Blueprint^{4IT} Design Suite is changing the economics of IT through design science that solves IT complexity and quality of service problems while improving the efficiency of IT data centers.

You wouldn't begin a build or remodel of a building without a blueprint, right? And you certainly wouldn't occupy a building that did not conform to codes or standards, right? Well isn't it time for us to have a blueprint for IT?

Our solution provides the IT Design "science" and automation to create tailored IT Blueprints and prescriptive Roadmaps that links architecture, engineering and system operations into "business-optimized" IT designs that respects workloads, physics and business outcomes.

Our Blueprint^{4IT} Design Suite provides you with:

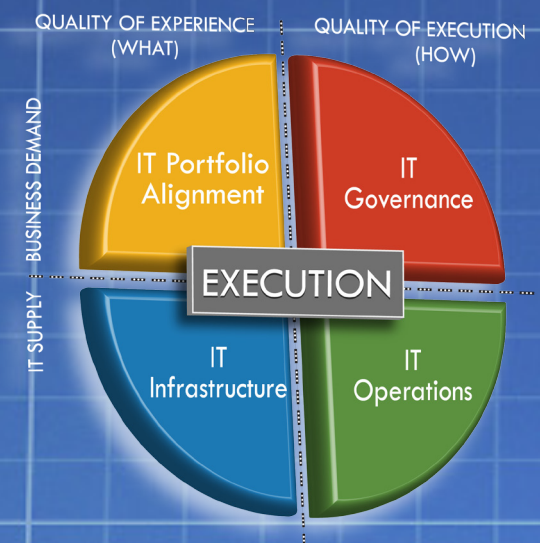

- Intelligent Design Studio & Solution Modeling
- Alogrithmic Design Engine with Data Import Adapters
- Expert Design Rules Database & Patterns Repository
- Iterative Design Automation & Decision Analytics
- Dynamically generated Blueprint^{4IT} tailored to your needs.
- Bill of Materials for Turnkey Program execution

Blueprint⁴IT tailored to your business needs.

DO YOU HAVE YOUR BLUEPRINT⁴IT YET?

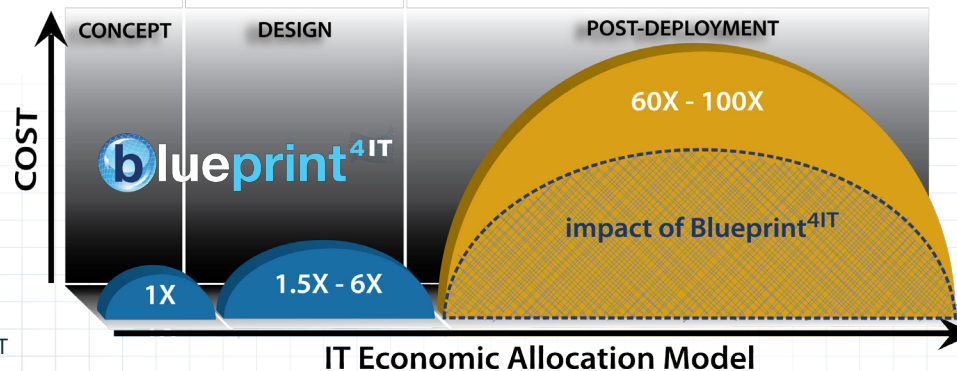

Accelerate your strategic IT Programs by applying intelligent design methods and expert knowledge with the Blueprint⁴IT Design Suite.

Changing the Economics of IT

VALUE IMPACT

- RADICAL GROWTH EFFICIENCY
- HIGHER IT PRODUCTIVITY
- INCREASED SPEED TO MARKET
- LOWER COST TO DESIGN & SUPPORT
- IMPROVED CONSISTENCY & QUALITY

Anatomy of the Blueprint⁴IT:

- Architectural Summary with Legend for guidance and overall context
- IT Supply Chain section that links business requirements to IT capabilities
- IT Patterns section that provides applications and workload profiles for design specification
- Logical design which identifies the optimal combination of hardware and software capabilities based on workload profiles
- Tailored Infrastructure Physical design to specify what IT resources to leverage and where to deploy them
- Infrastructure Management & Operations design to specify how to manage the resources being deployed in runtime
- Bill of Materials that lists all of the capabilities needed to build and operate the optimized solution

Intelligent Design Studio

- Visualize your Blueprint for IT
- Profile your Applications & Infrastructure
- Analyze and Assess IT Design "Fitness"
- Import Current Environment Data

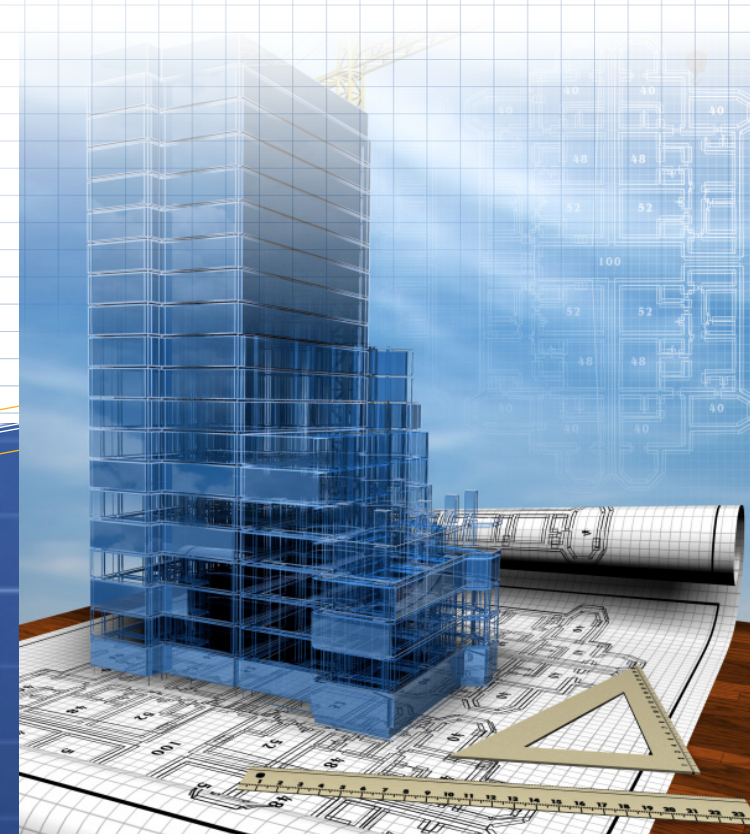

Algorithmic Design Engine

- Quickly Match your Applications to Patterns
- Enable Decision Support Analytics
- Guide and Optimize your IT Blueprints
- Leverage an Expert Design Rules Database

Process Automation

- Dynamically Generate your Blueprints for IT
- Establish an Iterative Design Process
- Customize your IT Solution Roadmap
- Automate your IT Design Process

WE'VE TRANSFORMED IT DESIGN FROM AN ART TO A SCIENCE. ARE YOU READY?

At Adaptivity we have developed a flexible and robust design suite that will optimize your IT Design Lifecycle.
